

1. Robust Encryption: Ensure privacy locally using end to end encryption with state-of-the-art encryption algorithms, protecting your conversations from unauthorized access (similar to Signal app for phones).

2. User-Friendly Interface: Seamlessly integrate SecureChat into your Discord interface for a hassle-free, intuitive experience.

3. Transparent Security: Stay informed with real-time security indicators, assuring you of the encryption status in every conversation to prevent man in the middle attacks.

SECURECHAT THE DISCORD PLUGIN

Using the feature set of discord which is very user friendly my team want to provide users a more secure messaging experience with easy of use in mind.
