

**1. Robust Encryption:** Ensure privacy locally without a server using end to end encryption with state-of-the-art encryption algorithms, protecting your conversations from unauthorized access (similar to Signal app for phones).

**2. User-Friendly Interface:** Seamlessly integrate SecureChat into your Discord interface for a hassle-free, intuitive experience.

**3. Cross-Platform Compatibility:** Enjoy secure communication across devices – PC, Mac, Android, iOS, Game consoles – without compromising on convenience.

**4. Transparent Security:** Stay informed with real-time security indicators, assuring you of the encryption status in every conversation to prevent man in the middle attacks.

# SECURECHAT THE DISCORD PLUGIN

Using the feature set of discord which is very user friendly my team want to provide users a more secure messaging experience with easy of use in mind.
